

MILLENIUM Heart Strong Program

HOME HEALTH CARE

Congestive Heart Failure CHF

FACT:

- CHF is the leading cause of hospitalization in the elderly
- CHF is the most frequent disease state for elderly resulting in re-admission within 30 days
- 50% of all re-admissions could be prevented using a multi-disciplined strategy to improve medication compliance including: dietary counseling, disease state education and follow-up

How "Heart Strong" Works

Millenium incorporates multi-discipline care coordination offering:

- Individualized patient care management
- Focused on education and treatment
- Tapered in-home visits
- Education and treatment
- Efficient multi-discipline communication
- Effective physician communications
- Transitioning to independence

Program Benefits

- Millenium provides an immediate response to a patient's needs.
- We incorporate a collaborative process, using our combined knowledge and resources to assess need and provide treatment
- Millenium facilitates care transition, stimulates improved outcomes and patient independence
- Effective physician communications transition to independence

The Millenium Heart Strong Program Improves Outcomes and Reduces Admissions
