

Low Vision Program

Develops strategies for achieving an individual's functional goals through adapting their environment and reducing limitations resulting from loss of vision.

FACT:

- Experts predict that by 2030 the rate of vision loss will double along with the country's aging population.
- 2/3 of the legally blind population are seniors who lost vision as a result of age related eye diseases.

How the Low Vision Program Works:

- Multi-Discipline Care Coordination
- Home environmental evaluation and adaptations to improve safety and fall prevention
- Education and daily activities techniques
- Functional mobility training
- Community resource evaluation and referral (as appropriate)
- Individualized patient care management

Program Benefits

- Immediate response to patient needs
- Collaborative patient management
- Facilitates care transition
- Improved outcomes and independence
- Reduced hospitalizations
