

Orthopedic Rehabilitation

Detailed clinical evaluation and individualized care plan assists the client in improving strength, mobility, and ADL independence.

FACT:

- 1/3 of seniors fall each year with over 600,000 patients hospitalized.
- Among people age 65 and older, falls are the leading cause of injury and death.
- More than 95% of hip fractures are caused by falls.

The Difference is the Details

Our team of Nurses, Physical and/or Occupational Therapists complete a comprehensive evaluation of the patient's physical & environmental status.

Key Focal Points

- Multi-discipline care coordination
- Individualized patient care management
- Comprehensive assessment of physical and functional status
- Review of prescribed & OTC medications
- Home safety evaluation
- Gait and balance status
- Proper use of assistive devices

Program Benefits

- Immediate response to patient needs
- Collaborative patient management
- Facilitates care transition
- Improved outcomes and independence
